

Air Balancing Devices Sliding Blade Damper • Neck Mounted For Round Necks

Models: D-100

Available Sizes:

Sizes 6", 8", 10", 12" and 14

Standard Finish: Mill

General Description

- The TITUS D-100 is a neck mounted sliding blade damper used in round duct applications.
- D-100 dampers have gang operated radial blades. Blades slide at right angles to the duct, allowing the damper to work effectively in flexible duct applications.
- The D-100 is neck mounted.
- Damper is adjusted at the screwdriver operator slot.
- Material is heavy gauge galvanized steel.
